

# Customer Onboarding & Go-Live Checklist

Medical-Supply ERP on Odoo 18 — taking a new customer from empty database to running the business.

**How to use this:** work top to bottom and tick each box. Steps 0–1 are technical (done once per customer); steps 2–13 are configuration inside Odoo. A typical 5–10 user company takes about **1–2 hours** end to end. Menu paths are shown like [Settings > Users](#) .

## 0 Before you start — gather this from the customer

- ☐ Legal company name, full address, phone, email, and tax / VAT ID
- ☐ Company logo (PNG or SVG) and a square favicon
- ☐ Base currency (SDG) and any foreign currencies they buy/sell in (USD, EUR)
- ☐ User list — name, email, and role for each of the 5–10 people
- ☐ Bank account details — bank name, account number, and currency for each account
- ☐ Product / item catalogue (or a representative sample to start)
- ☐ Warehouse / branch list and storage areas
- ☐ Opening balances — stock on hand (with expiry), customer & vendor balances, bank balances

## 1 Provision the instance (one command)

- ☐ Create a DNS **A record** for the subdomain (e.g. `acme.yourdomain.com` ) pointing to the server IP
- ☐ Run: `./scripts/new-tenant.sh acme acme.yourdomain.com admin@yourdomain.com`
- ☐ Confirm `https://acme.yourdomain.com` opens the login page with a valid padlock

**What this does:** creates the customer's own database, installs the medical-supply module set, gets the SSL certificate, and routes the subdomain to their database. Their data is fully isolated from every other customer.

## 2 Secure the admin account

- ☐ Log in as `admin` and immediately set a **strong password**
- ☐ Set language to **Arabic** and the correct timezone — [Settings > Users > admin > Preferences](#)
- ☐ Confirm the database manager is hidden ( `list_db = False` ) so no one can see other databases

## 3 Company profile

[Settings > Companies](#)

- ☐ Company name, logo, full address, phone, email, tax ID
- ☐ Set base currency **SDG**; enable **multi-currency** and an exchange-rate source if they import or price in USD/EUR
- ☐ Set the fiscal year and lock dates — [Accounting > Configuration > Settings](#)
- ☐ Configure the document layout (letterhead, colours, footer) used on invoices & purchase orders

## 4 Users & access rights

[Settings > Users & Companies > Users](#) — create one per person, set language Arabic, send the invite.

| Role                  | Typical access rights to grant                       |
|-----------------------|------------------------------------------------------|
| Warehouse / Inventory | Inventory: User or Manager                           |
| Procurement / Buyer   | Purchase: User or Manager                            |
| Sales                 | Sales: User; Invoicing: read                         |
| Finance / Accountant  | Accounting: Accountant or Adviser                    |
| Owner / Manager       | Settings (Administration) — limit to 1–2 people only |

## 5 Contacts (vendors & customers)

### Contacts

- ☐ Add **vendors / suppliers** with their payment terms and currency
- ☐ Add **customers** (clinics, hospitals, pharmacies) with payment terms and delivery addresses
- ☐ Tag / categorise them (e.g. Supplier, Hospital, Pharmacy) for easy filtering and reporting

## 6 Bank & payment setup

### Accounting > Configuration > Journals / Bank Accounts

- ☐ Add the company's **bank account(s)** — one per account/currency
- ☐ Create the matching **Bank journal(s)**; add a **Cash journal** if they handle cash
- ☐ Define **payment terms** (e.g. Immediate, 15 days, 30 days)
- ☐ Confirm bank reconciliation is ready (the OCA reconciliation module is installed)

## 7 Chart of accounts & taxes

### Accounting > Configuration

- ☐ Confirm or import the **chart of accounts**
- ☐ Configure **taxes** (VAT rate / exempt) and set the default sale & purchase tax
- ☐ Set default income, expense, and inventory accounts

## 8 Warehouses & locations

### Inventory > Configuration

- ☐ Define the **warehouse(s) / branches**
- ☐ Set up internal **locations** (storage, quarantine, expired/damaged)
- ☐ In Inventory Settings, enable **Lots & Serial Numbers** and **Expiration Dates**
- ☐ Set removal strategy to **FEFO** (First Expiry, First Out) so near-expiry stock ships first

## 9 Products / items

### Inventory > Products

- ☐ Create product **categories** (e.g. Pharmaceuticals, Devices, Consumables)
- ☐ Set **units of measure** (box, strip, vial, piece) and pack conversions
- ☐ Create products as **Storable**, tracked **by Lot**, with **expiration tracking on**
- ☐ Enter cost price, sales price, taxes, and an internal reference / barcode
- ☐ Add **reordering rules** (min / max) per product and warehouse
- ☐ Add **vendor pricelists** (purchase price and lead time per supplier)

## 10 Opening balances & initial stock

---

- ☐ **Stock on hand:** run an Inventory Adjustment to load quantities *with lot numbers and expiry dates* — `Inventory > Operations > Physical Inventory`
- ☐ **Opening receivables/payables:** enter open customer invoices & vendor bills, or a single opening journal entry
- ☐ **Opening bank/cash balances:** post via journal entry and reconcile the opening statement

## 11 Branding

---

`Settings > General Settings > Nile Theme`

- ☐ Upload the navbar logo and favicon; set the browser-tab name
- ☐ Pick the colour palette; confirm Arabic / RTL layout looks right

## 12 Go-live verification — the "ready for business" gate

---

- ☐ **Run one full cycle end to end:** Purchase Order → Receive (with lot & expiry) → Sales Order → Delivery → Customer Invoice → Register Payment → Reconcile
- ☐ Check an inventory report shows correct quantities and expiry dates
- ☐ Check an Aged Receivable / Aged Payable report is correct
- ☐ Nightly backup scheduled ( `DB_NAME=acme bash scripts/backup_db.sh` ) + offsite copy + one test restore done
- ☐ SSL padlock valid; only 1–2 people have Settings (admin) rights
- ☐ Delete any demo / test records created during setup

## 13 Handover

---

- ☐ Deliver credentials **securely** (password manager or sealed handover — never plain email)
- ☐ Run a short training session per role (warehouse, buying, sales, finance)
- ☐ Share the user manual — `docs/manual` (EN/AR)
