

Medical-Supply ERP
DISTRIBUTION MANAGEMENT
PLATFORM

LIVE SYSTEM DEMONSTRATION

Run your entire business in **one system.**

From scattered Excel sheets to a single, connected platform – inventory, procurement, sales and accounting, in Arabic and English.

✓ Built on Odoo 18 Community + OCA – no per-user licence fees

Live demonstration · 10 June 2026 · Demo environment: **Sudan MedSupply Co. (Khartoum)** · every figure shown is real data you can open and inspect

Excel got you started. It won't keep you safe.

No single source of truth

Every sheet is a different version. The numbers never quite agree.

Stock is a guess

On-hand quantities are only true the day someone counts them.

Medicine expires on the shelf

No expiry or batch tracking means silent write-offs every month.

Critical items run out

Nothing warns you when insulin or gloves quietly hit zero.

Money you can't see

Who owes you, how much, how overdue?
Buried across tabs.

No accountability

Anyone can change any cell – and no one knows who did.

Every one of these is a real cost – in cash, in spoilage, and in patient trust.

The hidden tax of running on spreadsheets

Expired stock

Medicines have hard expiry dates. Without batch tracking, they reach it on your shelf – pure loss.

Stockouts

Running out of a life-saving item means a lost sale today and a lost customer tomorrow.

FX erosion

You buy in USD and sell in SDG. Without dated rates, the exchange quietly eats your margin.

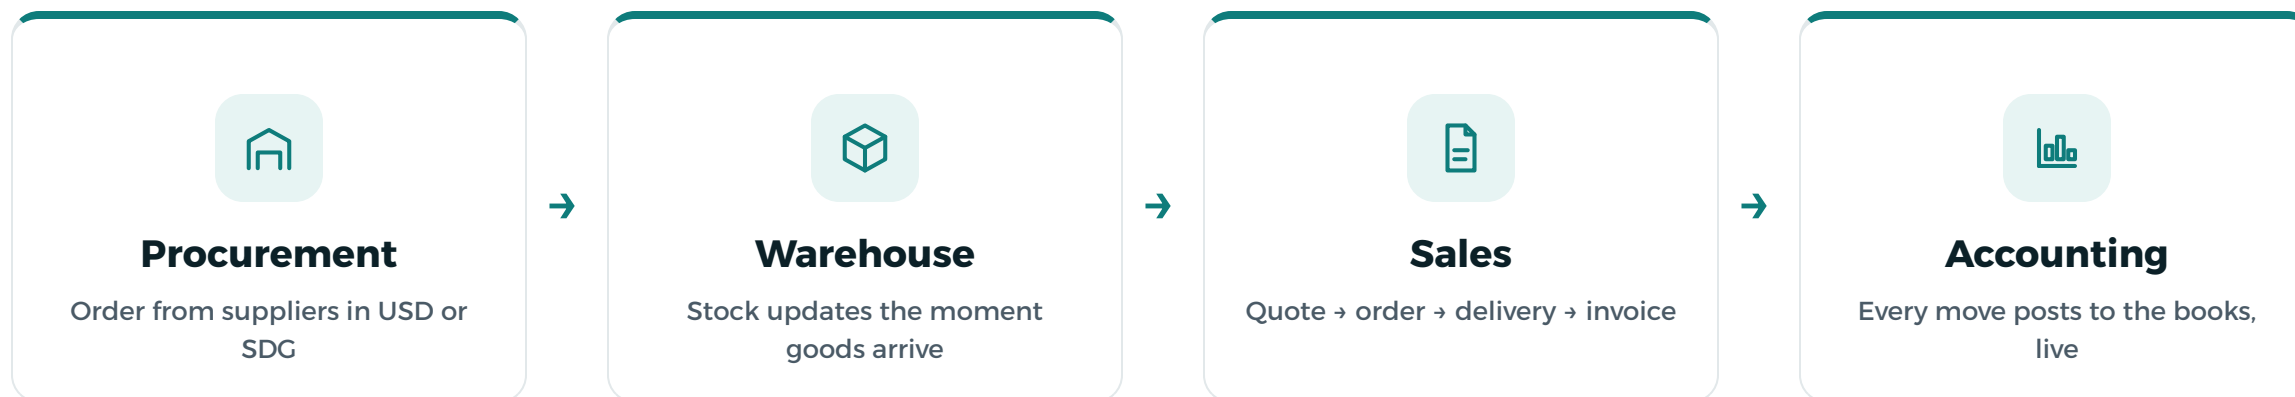

Wasted hours

Every week, the same numbers are re-typed across sheets – time your team could sell with.

None of this shows up on an invoice – which is exactly why it never gets fixed. **One system makes all of it visible.**

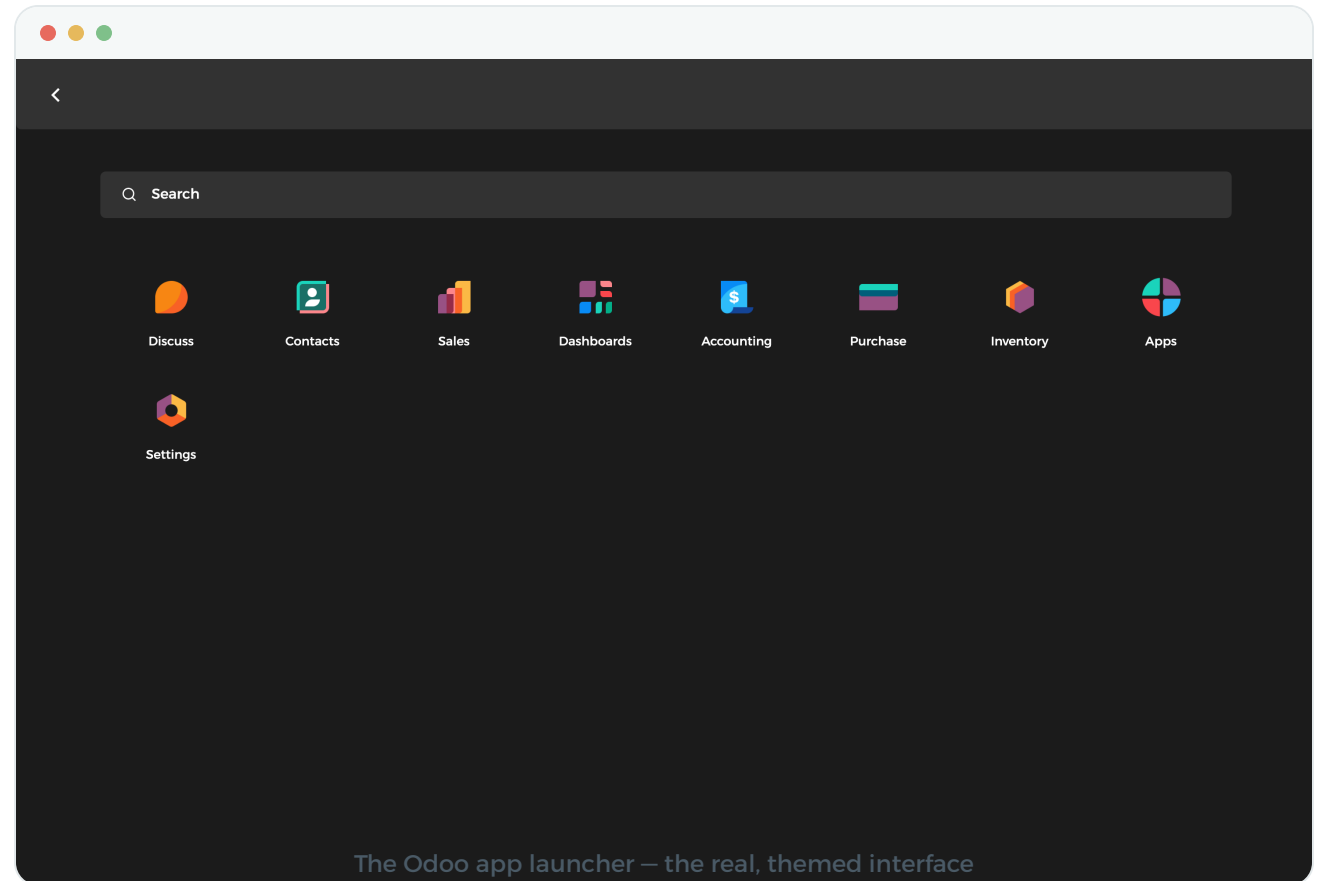

One system. Enter once – it flows everywhere.

A purchase updates your stock. A sale updates stock **and** raises the invoice **and** posts to your accounts – **automatically**.
No re-typing. One set of numbers everyone trusts.

Everything today is live – data you can open and inspect

- ✓ **Seven connected apps**, one login, one database – Contacts, Sales, Purchase, Inventory, Accounting, Dashboards and Settings.
- ✓ **Web-based**. Open it from the office, the warehouse, or a phone – nothing to install on each PC.
- ✓ **Real records**. The orders, invoices and stock you'll see are seeded demo data for **Sudan MedSupply Co.**
- ✓ Switch on more apps any time – the platform grows with you.

SHOW LIVE Open the app launcher (the 9-dot grid) and show the live apps.

What we'll show you – live

1  Your catalogue & live stock

2  Expiry, batches & cold chain

3  Automatic re-ordering

4  Multiple warehouses & locations

5  Buy in USD, sell in SDG

6  Sell & invoice in a few clicks

7  Who owes you & your cash position

8  Roles, control & accountability

... then your questions: **cost, growth, moving off Excel, training & support.**

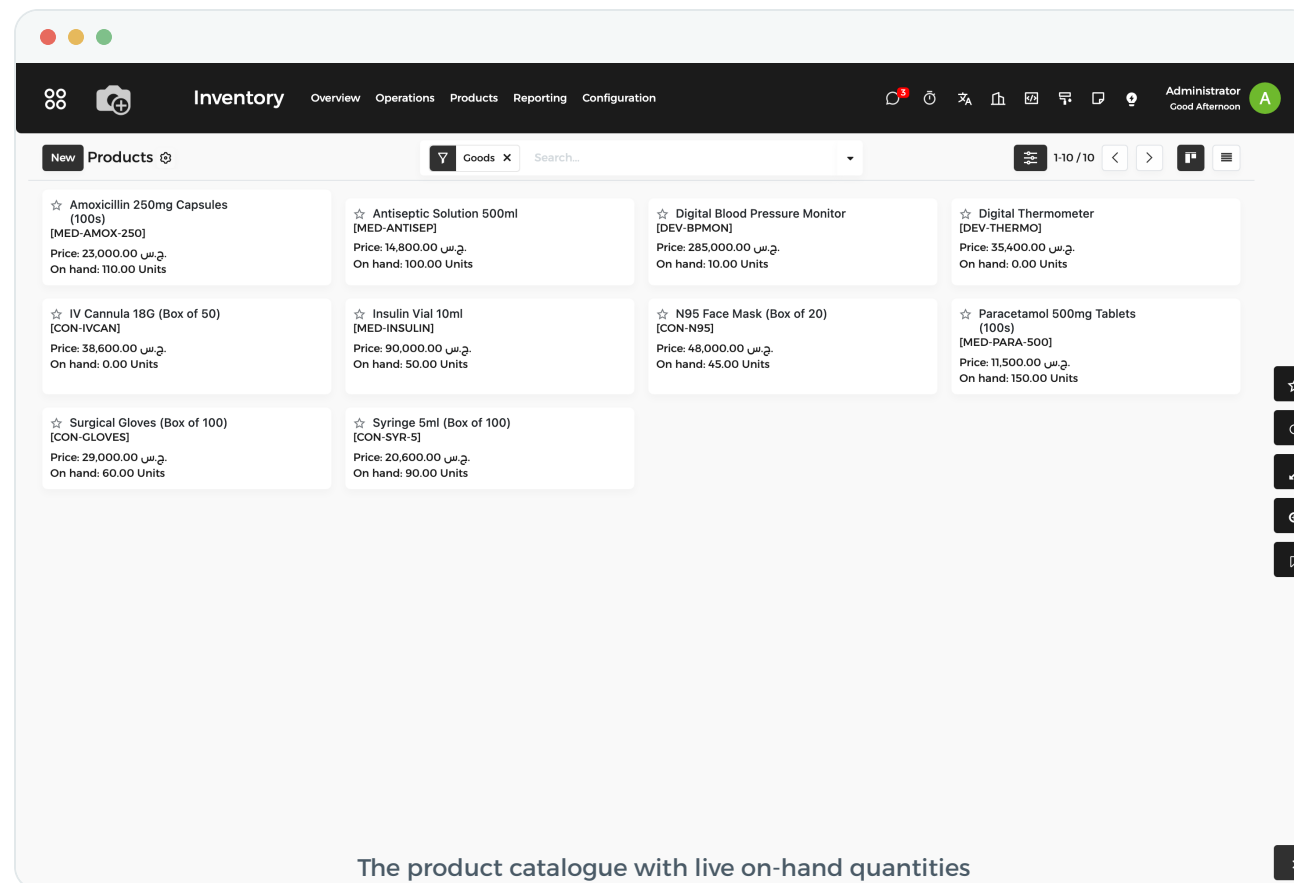

Every product, with real-time stock – one source of truth

- ✓ **All 10 medical items** in one catalogue: Pharmaceuticals, Consumables and Devices.
- ✓ **Live on-hand** that updates itself: Insulin 50, Paracetamol 150, Gloves 60 units.
- ✓ Internal references, cost, sale price and 15% tax built into every product.

10 products

3 categories

Live on-hand

SHOW LIVE Open Inventory ► Products, search “Insulin” and open its card.

Never write off expired stock again

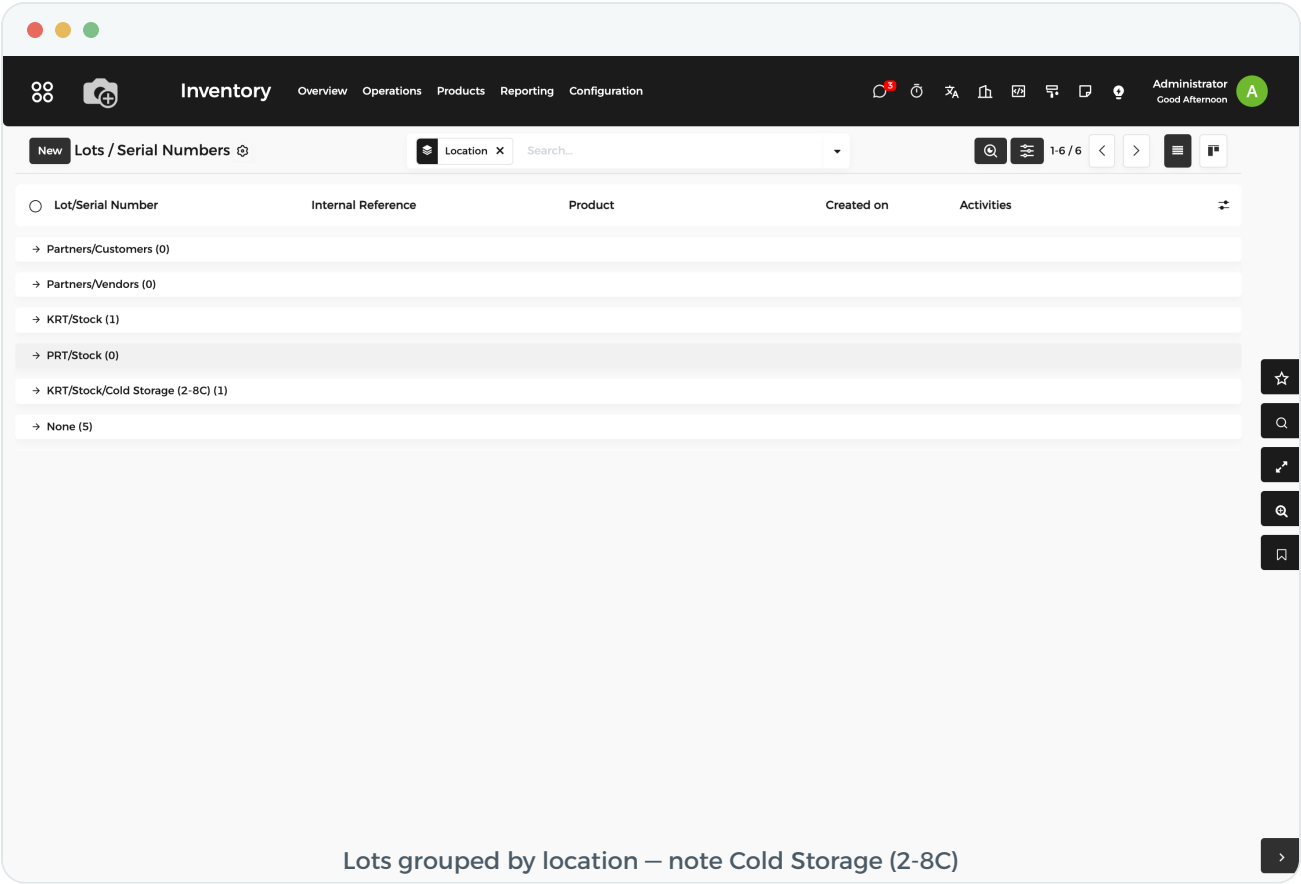

- ✓ **Every batch carries its expiry date** – and the system sells oldest-first (FEFO) on its own.
- ✓ **Cold-chain items** like Insulin live in a dedicated **Cold Storage (2-8°C)** location.
- ✓ **Full recall traceability** – find every unit of a bad lot in seconds.

Lot + expiry

FEFO removal

Cold Storage 2-8°C

Recall-ready

SHOW LIVE Inventory ► Lots/Serial Numbers – open LOT-GULF-01 (Insulin) and show its expiry.

The system watches your stock so you don't have to

- ✓ **Set a min / max per item:** Insulin 20/80, Paracetamol 50/200, Gloves 30/120.
- ✓ When stock hits the minimum, it **flags – or drafts the purchase order – automatically.**
- ✓ No more learning about a stockout from an unhappy customer.

Invoice INV/2026/00001 – Posted & Paid

SHOW LIVE Sales ► open S00001, then its invoice – show the green PAID banner.

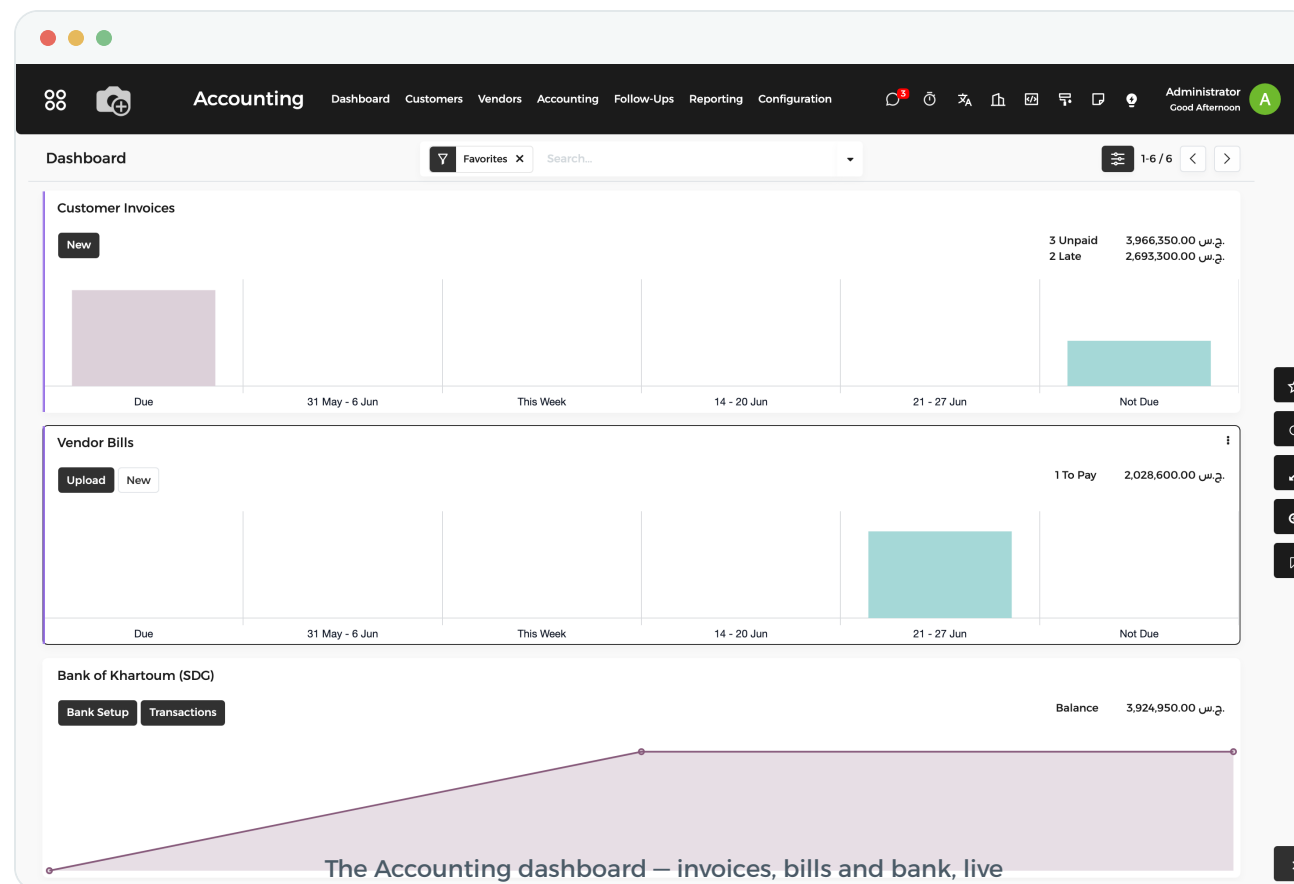

See your cash position the moment you log in

- ✓ **Live dashboard:** 3 invoices unpaid (3,966,350 SDG), 2 already overdue.
- ✓ **Bank of Khartoum balance 3,924,950 SDG** at a glance, with a trend.
- ✓ One click prints an **Aged Receivable** report – chase the right people, on time.

Unpaid & overdue

Bank balances live

Balance Sheet · P&L · Aged – any day

**SHOW LIVE** Accounting ► Dashboard – point at Unpaid / Late and the live bank balance.

Each person sees exactly what they should

- ✓ **Six role-based users:** Manager, Procurement, Sales, Warehouse, Accountant, Admin.
- ✓ The **warehouse keeper can't edit prices**; the **sales rep can't see the books**.
- ✓ Every record keeps a **full history of who changed what, and when** — Excel can't.

6 user roles

Granular permissions

Full audit trail

The screenshot shows the 'Access Rights' configuration for a user named Layla Ibrahim (General Manager). The interface includes a top navigation bar with 'Settings', 'General Settings', 'Users & Companies', and 'Spiffy Configuration'. The user's name and email (layla) are displayed at the top. Below this, there are tabs for 'Access Rights', 'Preferences', and 'Account Security'. The main content area is divided into two columns: 'SALES' and 'ACCOUNTING'. Under 'SALES', there are fields for 'Sales' (Administrator) and 'Inventory' (Administrator). Under 'ACCOUNTING', there are fields for 'Accounting' (Advisor), 'Bank', and 'Dashboard' (Dashboard). At the bottom, there are fields for 'Administration' (Settings) and 'Canned Responses' (Canned Response Administrator). A sidebar on the right contains icons for home, search, and other navigation functions. The bottom of the screen shows the title 'Access Rights for Layla (General Manager)'.

SHOW LIVE Settings ► Users — open Layla (General Manager) ► Access Rights.

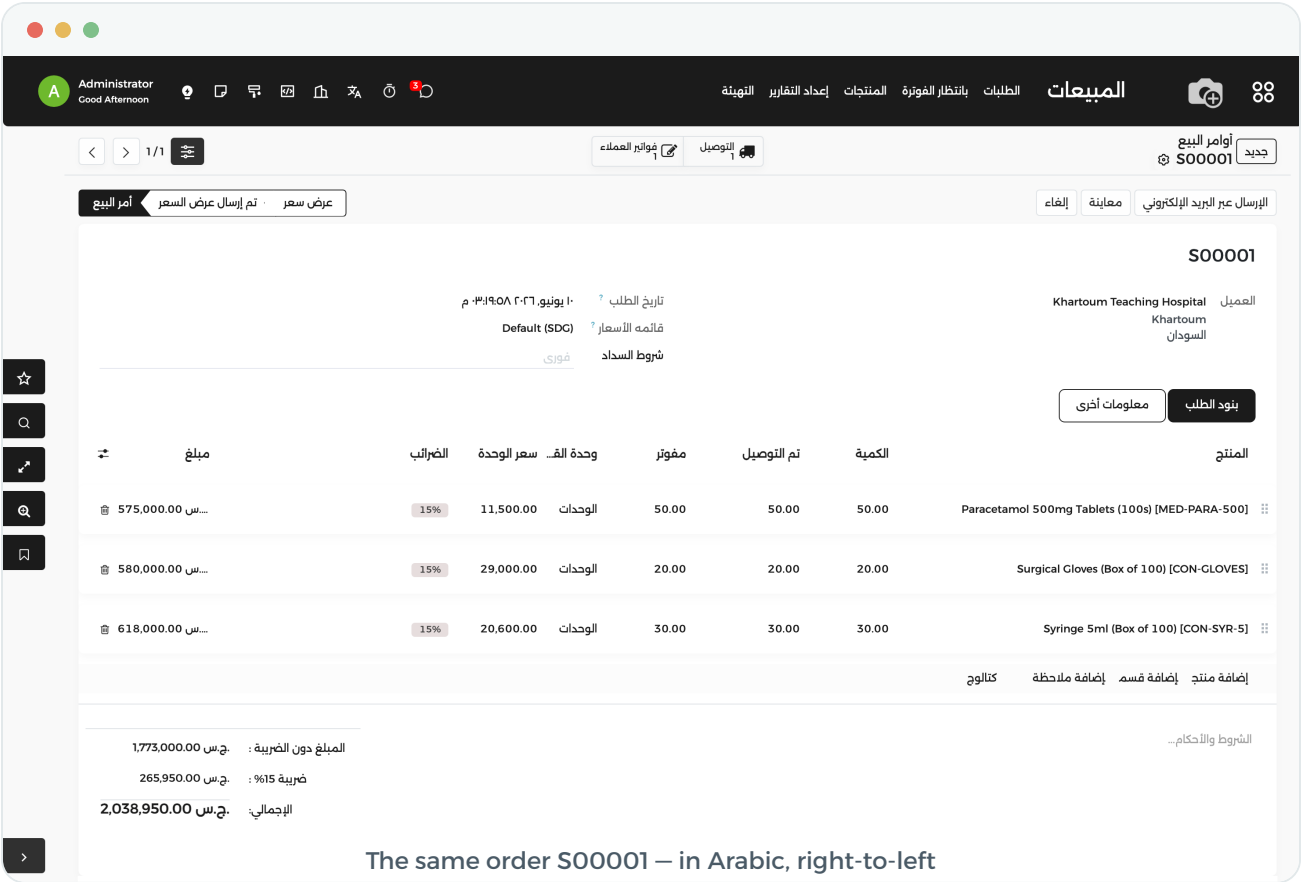

The whole system – and the manual – in full Arabic

- ✓ **Right-to-left, fully translated.** Your team works in the language it's comfortable in.
- ✓ **Per-user** – the accountant in Arabic, an English-speaking partner in English, same data.
- ✓ The 17-chapter **user manual ships in both languages**, with real screenshots.

The same order S00001 – in Arabic, right-to-left

SHOW LIVE

Switch my user to Arabic and reload – show the same screen, right-to-left.

Your questions, answered

The questions every owner asks first

Cost, growth, moving off Excel, training – the practical realities of switching, answered plainly.

No per-user licence fees. Ever.

- ✓ Built on **Odoo 18 Community** and trusted open-source (OCA) modules – the **software licence is free**.
- ✓ You invest in **setup, training and support** – not in monthly seats.
- ✓ Add users (you saw six) at **no extra licence cost** as your team grows.
- ✓ You **own your data and your database**. No vendor lock-in, no ransom at renewal.

Enterprise ERPs charge **per user, per month** – for the same features you just saw working.

CAN IT GROW WITH US?

Start with what you need. Add the rest when you're ready.

Today you're running five apps. The same platform has dozens more — switch them on when the business calls for them, with no migration and nothing to rip out.

RUNNING TODAY

- Inventory
- Purchase
- Sales
- Accounting
- Contacts

AVAILABLE TO SWITCH ON

- Manufacturing
- Point of Sale
- Barcode scanning
- HR & Payroll
- CRM
- e-Commerce
- Projects
- Maintenance
- Quality
- Fleet

Need something specific to your business? **Custom modules and reports are built to fit** — the platform is yours to extend.

Your spreadsheets are the starting point, not the enemy

- ✓ Import **products, customers, suppliers and opening stock** straight from your Excel / CSV files.
- ✓ We **map your columns once** – the data lands in the right place.
- ✓ Run the new system **alongside Excel** for a short parallel period to build confidence.
- ✓ Go live **when you're ready**, not before.

Most of what you keep in Excel today imports in a single afternoon.

A complete manual already exists – in Arabic and English

- ✓ A **17-chapter illustrated user manual** with **53 real screenshots**, written for non-accountants.
- ✓ **Role-based**: each person learns only their part – warehouse, sales, accounting.
- ✓ **Hands-on training** during rollout, on your own data.
- ✓ We don't hand you a login and a goodbye – **ongoing support** is part of it.

The manual you saw referenced is already written, bilingual, and ready for your team.

Secure, web-based, reachable from office, warehouse or phone

- ✓ Runs on **your own server or in the cloud** — your choice, your control.
- ✓ Access from **any browser** — no software to install and update on each PC.
- ✓ **Automated daily backups** so your business is never one crash from disaster.
- ✓ **Encrypted login** and role-based access keep your data safe.

Start on a single server today; move to the cloud as you grow — same system, same data.

Excel today vs. your new system

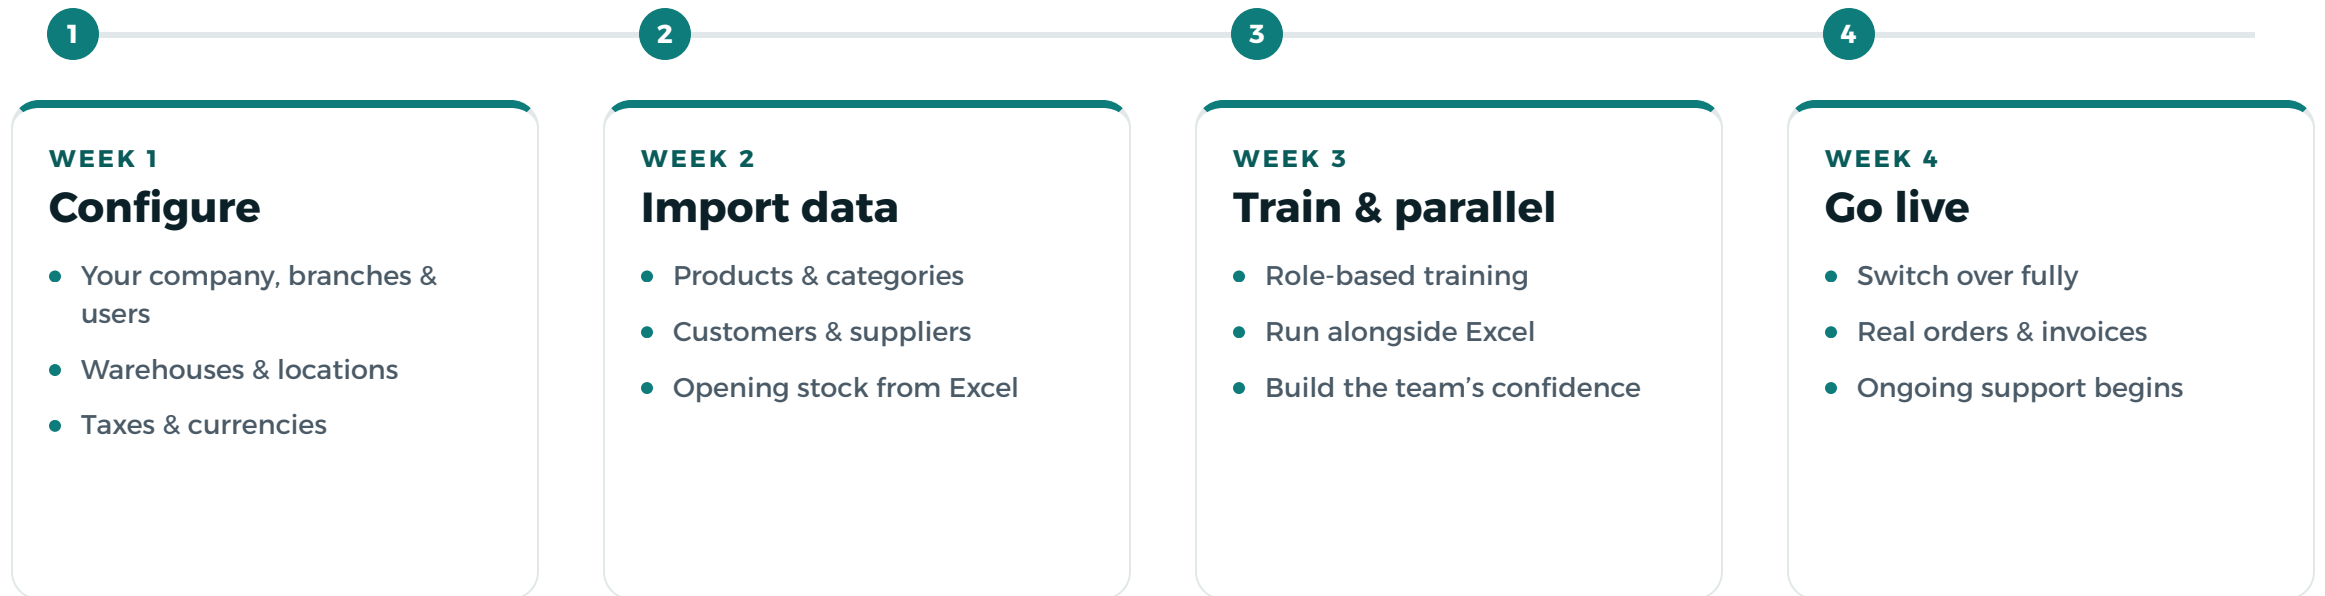

CAPABILITY

EXCEL TODAY

YOUR NEW ERP

Single source of truth	✗ Many files, many versions	✓ One shared database
Real-time stock levels	✗ Only after a manual count	✓ Live, always current
Expiry & batch tracking	✗ None	✓ Per-lot, with FEFO
Re-order alerts	✗ You find out too late	✓ Automatic min/max
Multi-currency (USD / SDG)	✗ Manual, error-prone	✓ Dated rates, auto-converted
Invoicing & 15% tax	✗ Typed by hand	✓ One click from the order
Who owes you / cash view	✗ Buried in tabs	✓ Live dashboard & aged report
Per-person access & audit	✗ Anyone edits anything	✓ Roles + full history
Arabic + English	✗ Whatever you build	✓ Built-in, right-to-left
Room to grow	✗ Hits a ceiling	✓ Add apps & custom features

Live in about four weeks

A clear, low-risk path — **you're never without a working system for a single day.**

NEXT STEPS

Let's set up **your** business in the system.

We take your real product & customer list

We configure a private demo with your own data

You and your team test-drive it, hands-on

We agree a go-live date that suits you

Everything you saw today was real. Next, let's make it yours.
